Fine Work is Being Done At The Town Park

Green Lawns are Showing After Recent Rains

Big improvements at the New Park are in evidence this week.

A carpet of green grass has made its appearance on the east side after the recent rains, and the west side will soon follow suit. Most of the many trees are showing decided signs of life.

Many improvements for the swimming pool section are planned and will be in evidence soon.

The work is in the capable hands of Mr. Alex Patterson and T. Van Wert Sr. who are establishing reputations for themselves in landscape gardening.

Probably no public enterprise undertaken in Redcliff has created more interest or will receive greater support than that of Memorial Park. It only goes to show what can be done by good management and co-operation.

SAFETY DRIVING ESSAY CONTESTS

Growing interest in measures to bring about greater driving safety in this province is being demonstrated in various forms and in different districts.

In Edmonton, the branch of the Alberta Motor Association sponsored an essay competition which was staged as a feature of the annual Boys' and Girls' Fair. This competition was designed to arouse fresh interest on the part of boys and girls in safe driving and the growing need for greater safety on the highways and streets.

Numerous entries were received, giving the sponsors encouragement to stage the competition on a larger scale next year. Substantial cash prizes were given the winners.

The essays gave strong proof of the fact that there is a growing realization among school students as to the necessity of keeping traffic under proper control, and drivers exercising extreme care to avoid accidents.

The success of essay contests in Edmonton and Calgary as well as other large centres should encourage many rural points to carry out similar competitions, in the opinion of officials of the Alberta Motor Association.

Friends will be sorry to hear that Arthur Rexin who has been ill for the past week is still confined to the hospital, where he is receiving treatment.

King and Queen Are Welcome to Washington

President and Mrs. Roosevelt Greet Royal Guests

History was made this morning when The King and Queen, King George VI and Queen Elizabeth, met in the Grand Central Station at Washington, D. C.

For the first time in history a reigning monarch has stepped onto American soil.

The King and Queen were conveyed to Washington from the American border by Ambassador Cordell Hull and his Staff.

At Washington the Royal Party was met by President and Mrs. Roosevelt and attendants at the Grand Central Station and were then escorted to the White House.

The next few days will give their Majesties a taste of American hospitality as dispensed from the White House.

American hospitality is proverbial and no doubt both guests and hosts will be delighted with the experience for no more democratic sovereigns ever graced a throne nor no more royal couple ever occupied a position of such distinction in any Republic.

GORDON MEMORIAL

Sunday June 11th, 1939.
10 A. M. Sunday School.
7.30 Evening Service. Mr. Curtis Buchholz will give his report on the Fifteenth Alberta United Church Conference held in Calgary last week.

Albertans will soon be using auto robes, blankets and machines, made entirely of wool grown and manufactured in Alberta, according to George A. Clah, chairman of the provincial marketing board. He states that, with the completion of arrangements in which the board assisted, Alberta's new woollen mill will go into production July 1st. The mill building at Magrath was assisted by the government to the extent of \$6,000. The company is composed of 92 Alberta business men, the majority of whom are wool growers. This is said to be the only wool-mill between Montreal and Vancouver, and is only the fourth to be operated in the West.

Former Redcliff Man Joins Benedicts

Worship - Lewis

A wedding of much interest to Redcliff friends took place in Piapot, Sask. yesterday when Miss Evelyn Lewis, daughter of Mr. and Mrs. Chas. Lewis of Piapot became the bride of Mr. Sidney Edward Words, elder son of Mr. and Mrs. G. H. Words of Redcliff.

The wedding took place at the home of the bride's parents. The rooms were beautifully decorated for the occasion, a lovely floral arch forming a framework for the wedding party during the ceremony which was performed by the Rev. Mr. King.

After the wedding a reception was held which was largely attended, and the young couple left for a honeymoon at San Francisco, stopping off for a few days at Nelson B. C. en route.

Upon their return Mr. and Mrs. Words will reside at Piapot where Mr. Words is an accountant in the branch of the Imperial Bank of Canada at that point.

The Review joins with sister many friends in Redcliff in wishing him and his bride a long and happy married life.

Mr. and Mrs. G. H. Words and son Cyril were among the guests.

WANTS ACTION ON RAILWAYS

Judge Emerson Costworth

retired senior judge of York County, Ontario, who has become president of the Citizens' Group for Railway Action. His Honour, a former member of parliament and a former mayor of Toronto, is actively interested in the work of the organization which is endeavoring to lay the facts of the Canadian railway problem before the public.

Citizens Band Of Redcliff Made A Find Showing

Played 41 Royal Visit Celebration At Medicine Hat on May 26th

During the past few days we have heard numerous flattering remarks regarding the splendid performance and smart appearance of the Redcliff Citizens' Band on the day of the Royal Visit in Medicine Hat.

Redcliff has every reason to be proud of its Band and congratulations are due all members and especially Mr. Harry Turner, the leader. Mr. Turner has built up this fine organization of musicians from a very small nucleus of local enthusiasts.

The Review joins with the citizens of Redcliff in expressing its appreciation of the fine public spirit as shown by Mr. Turner and the members of his Band.

No doubt the Park Committee, which has done such splendid work to date are contemplating the erection of a bandstand in the near future so that all may look forward to the pleasure of hearing our Band frequently during the coming summer months.

Rev Ralph C. Crouse, who came up from the States last year to assume charge of services at the Prophetic Bible Institute Church at Calgary, has resigned.

A report from the Alberta Division of the Canadian Red Cross Society shows that contributions to the recent campaign including the Tag Day amounted to \$6,163.09 made up as follows:
City of Calgary \$4,523.58
Tag Day 660.14
Rural 979.37
Total \$6,163.09

NOTICE

Swimming Pool Tenders Wanted

Tenders for Caretaker of the Swimming Pool will be received up to and including the 21st of June, 1939. Duties to begin on June 30th. The lowest bidder not necessarily accepted. All tenders to be addressed to the Secretary, Mr. Bert Allison.

Last Royal Visit Broadcast From East

Will Be From Eastern Cities After United States Visit

The last Royal Visit Broadcasts are from June 12th to 16th, after Their Majesties return from the United States.

Monday, June 12th, 7.00-7.15 a.m. Actual broadcast of the return of Their Majesties from the United States at Delson Junction. There will be a rebroadcast at 8.15 p.m.

Tuesday, June 13, 9.30-10.00 a.m. A broadcast of the welcome to Their Majesties to Fredrickton by the Premier of New Brunswick. From 2.45 to 3.15 p.m. their will be an actual broadcast of the reception at Barrock Green Stadium in Saint John. At 8.15 p.m. a rebroadcast of the day's activities.

Wednesday, June 14th, 9.30-10.00 a.m. The arrival and welcome at Charlottetown, P. E. I. From 3.30 to 4.00 p.m. the arrival and welcome of Their Majesties at Pictou. And at 8.15 p.m. a rebroadcast of the day's activities.

Thursday, June 15th 8.15-9.00 a.m. Actual broadcast of welcome to Their Majesties at Halifax by Premier MacDonald of Nova Scotia. From 10.15 to 11.00 a.m. the speech by His Majesty from the State luncheon at Halifax. From 2.45 to 3.30 p.m. a broadcast of Their Majesties' departure from Halifax aboard the Empress of Britain. At 8.15 a rebroadcast of the day's activities.

Archie Carr, of Bursall, late of Owen Sound, and well known around this district, died in a Calgary Hospital last week. Interment took place at Calgary.

Rains West and North of here have been three times as heavy as in this district. The reserve moisture is nil here so we will need repeated rains to insure anything like a crop here.

Swimming Pool Officers Elected Tuesday Evening

Tenders for Pool Attendant Received Until June 21st

A meeting was held in the Legion Rooms on Tuesday evening for the purpose of appointing officers for the Swimming Pool for the coming season.

The officers elected were as follows: Pres., J. Hope, Vice-pres., Geo. Ordway, Secretary, B. Allison, Committee, Mayor Sangster, Mr. Rindahl and Joe Podesta.

The Committee then made arrangements for the opening of the swimming pool on July 1st.

It was decided to advertise for tenders to take care of the swimming pool. Applications are to be in the hands of the Secretary, Mr. Bert Allison, not later than June 21st. Duties of the caretaker will begin June 30.

Grasshopper Scourge In Redcliff, Threatens

Immediate Steps Necessary To Save Gardens

It has been brought to our attention that Redcliff is about to have a real grasshopper scourge if drastic measures are not adopted at once.

It would be a pity if all the fine gardens in town should be destroyed for want of a little foresight on the part of the proper authorities.

We understand the government has a distributing station in Medicine Hat where poison for destroying grasshoppers may be procured. If a quantity of this were made available to Redcliff gardeners at once, much destruction of vegetables would be avoided and empty cellars next winter prevented.

Today is the day. Next week may be too late.

Directors of Canadian Pacific Railway Meet King and Queen

Their Majesties King George VI and Queen Elizabeth, seen there taking the salute just before leaving for Montreal, met and shook hands with several directors of the Canadian Pacific Railway, who are also seen in this picture. Standing behind Their Majesties are, left to right, Sir Edward Goss, G.B.E., K.C., chairman and president, Canadian Pacific Railway; other directors present were: Ross McMaster and M. W. Wilson.

THEIR MAJESTIES

Were Received by President and Mrs. Roosevelt this Morning, at Washington, D. C.

WORLD HAPPENINGS
BRIEFLY TOLD

A gold boat was given the King and Queen at Ottawa as a gift from the Canadian government.

The Royal Air Force proudly put on a display for Empire Air Day with 5,000 planes in the greyish British air fleet.

Lost in thick fog, a United States army aeroplane crashed into the Lockheed observatory on Mount Hamilton, California, killing the pilot and at least two other persons.

A copy of Molotov's Naval and Military Journal, a newspaper of 1798, is owned by William G. Abbott of Winnipeg. It reports the campaign of Napoleon against the Turks.

Chancellor Hitler's new motorcar, Volkswagen Beachster, announced a decision by Germany to build a "Sieghied line" for defence against Poland and the east.

The British government has rejected Japanese claims for wider representation on the international settlement council at Shanghai. The United States also has rejected the Japanese claims.

One clothing rental firm in Toronto reported a complete "rent-out" of formal morning clothes for persons presented to the King and Queen. One rental house supplied 70 complete outfits.

Queen Mary was greeted enthusiastically by a large crowd when she visited "Children," a Boy Scouts' institution, and university women. The club provides recreation and clinical facilities for 2,000 girls and boys between the ages of 11 and 18.

Excitement Forty Years Ago

Ontario Paper Records Road Mishap

In Horse And Buggy Days

The St. Marys Journal-Argus says nowadays we are shocked by the highway accident record and look back to the good old horse and buggy days when life was safe and the pedestrians got a break. It was therefore a surprise to us the other days to observe in an old Journal-Argus file of forty years ago, no less than three local items on the same page calling attention to road mishaps. One item told of Billy Dyson, former St. Marys man, being injured in an accident on the Ingersoll Waterworks Co. for injuries sustained by being thrown from his buggy in that town. Another driver, a resident of Woodham, turned his young mare too swiftly onto Queen street and was happy in getting off with a broken shaft. Again a young man was thrown from his horse on Main street and landed on the road on his face. He was taken to the Ontario House and "comforted" and "brought within reach." All this excitement in 1881!

Date Is Movable

Time Man Entered America May Be

Placed Fast

Anthropologists have found evidence that a prehistoric "old timer"—pre-dating even the 10,000-year-old Hudson man—may have lived in the Rio Grande Valley of New Mexico, when camels and elephants romped the Western plain.

Frank Hibben, University of New Mexico anthropologist, gave official credence to such probability as a result of discovery of a finely fluted dart point in a Sandia Mountains cave just east of Albuquerque.

"There can be no doubt of the importance of this find," Dr. Hibben said, "nor of the possibility that we may have to move the date of man's entry into America back once more."

The dart was found some weeks ago by archeological students in a cave sealed by stalagmatic material which, Dr. Hibben said, precluded any possibility of disposal since the prehistoric age. "Unfortunately it was estimated to have been made somewhere between 10,000 and 25,000 years ago."

Canada's Permanent Force

Improved in The Conditions Of Service In U.S.

Improvement in the conditions of service of Canada's permanent force to select morale and to select men, intelligent young men was urged upon the government by Leslie Mutch (L.H. Winnipeg South), as the common approved defense estimate totalling \$17,000,000.

When so much attention and money was being devoted to defense, Mr. Mutch contended, more consideration should be given the human side of defense. Some of the best soldiers in the army, he complained, were "still living in the days of the bow and arrow" as far as procedure was concerned.

He advocated a contributory pension scheme for other ranks, allowances for minor children and the easing of the marriage regulations.

Flee From Danger
The Evict Of War

The easy acceptance with which we read how vast cities are to be evacuated if war begins makes us a travesty of the vaunt of civilization. These lives are to be emptied and the swarms of humans to be dispersed as the wind blows. London is to evacuate its children, but puts more hope in the security of its safety measures than Paris puts in the more limited measures it is taking.

In Paris the people are strongly recommended to go away from it. They are ordered to leave upon the arrival of what is officially cryptically described as "the period of tension."

Trains, buses, and every other motor vehicle are apportioned for this transport of the people from Paris. The large number who have relatives in the country are to go to the homes of those relatives, and the people of Paris without rural connections are to be placed in allied areas. Each arrangement has been notified of the district to which its residents are to be sent.

The city is to be cleared of its population, and its four millions and more to be sent to the suburbs. A million indispensable to protect buildings against fire and to give other services.

This evacuation plan for Paris is thought to have two flaws. A "period of tension" may precede war and allow for the escape of civilians to districts some distance from the city. And French people are of great difficulty to get out of the homes in which they are determined to stay and take their chances. This was tragically so in the devastated areas in the Great War. The same inability to leave the city is likely again to be encountered in Paris in any other war.

—Winnipeg Free Press.

New Royal Seal

Was Created For Use By His Majesty In Ottawa

A new royal seal had to be used for the King's visit. His Majesty affixed this special seal to the bills to which he gave royal assent on his visit to the Canadian parliament. The Royal Seal of Great Britain, used by the King in the British Isles, the seal used by the governor-general was considered not suitable for use by the King in Canada. The seal of the Governor-General submitted and secured the passing of a bill by parliament authorizing the creation of the new seal for the King's use.

HOME SERVICE

LET GRACIOUS PHRASES WIN FRIENDS FOR YOU

NEW EVIDENCE THAT INHERITANCE IS NOT INHERITABLE

New evidence that inheritance is not inheritable was announced before the American Psychiatric Association. Until recently it was believed that the children of families who have a history of insanity are likely to acquire one of the various mental diseases. Dr. Horatio Pollock and Dr. Benjamin Malsberg of the New York State Department of Mental Health, said. However, an intensive study of 300 students at state asylums, and of their parents, brothers and sisters, and other relatives, failed to show any pattern of inheritance such as the patterns which hold true for physical characteristics.

Forming Chess Legion

Thousands of Chess in France already have registered for a Chess Legion which is prepared to offer its services to France and to fight for the re-establishment of a homeland. There are at least 20,000 former soldiers and among the Chechs in France, and they are confident of forming from their ranks at least one infantry division of 12,000 well-trained men.

Know What To Say At All Times

No wonder Beth wins more attention than other girls. She seems always to know the apt, gracious thing to say.

In a jiffy she puts shy Bob at ease, says, "A glass of lemonade just fills the bill this balmy spring evening!" Another girl would have stammered, "Thanks!"

But it's easy to charm in any situation. You can't go up on empty phrases. A new friend drops in to say, "What an unexpected pleasure!"

Accept an invitation enthusiastically with "There's nothing I'd rather do when you want me." Or, "What a shame—I've already planned something."

Walking into a business office you appear confident, poised with "Please tell Mr. Hutton I am here. I have an appointment."

He makes your talk sparkle with bright new ways of saying things. He tells you that you are "plentiful as blackberries."

Accept an invitation enthusiastically with "There's nothing I'd rather do when you want me." Or, "What a shame—I've already planned something."

Walking into a business office you appear confident, poised with "Please tell Mr. Hutton I am here. I have an appointment."

He makes your talk sparkle with bright new ways of saying things. He tells you that you are "plentiful as blackberries."

AN EASY-TO-MAKE CHARMER!

By Anne Adams

Exhibit Sent To Paris

Canada Is Justly Proud Of Indian Children's Art Work

Canada has reason for pride in the craft work of Indian children—exhibit which has been sent to the League of Red Cross Societies in Paris, France, for loan to national Red Cross organizations.

It is the first all-Indian exhibit to be sent to Europe by Canada, by the Red Cross, although with other contingents have attracted considerable interest abroad, especially in Great Britain. The work is that of the Junior Red Cross in residential Indian schools of Canada—young artisans ranging in age from 8 to 16 years.

The exhibit includes some of the religious art work of Inukshuk Indian Day School, Oliver, B.C., which is a masterpiece of carving. One of the boys from this school, Francis Baisie, won a bronze medal and second-class honors at the exhibition of the Royal Drawing Society in London, a year ago, for pictures painted on buckskin. He is now making a special course which is given in Indian art at Santa Fe, New Mexico.

Other pieces in the exhibit feature the apical carving and basketry work of St. Paul's Indian Residential School, North Vancouver, one of the finest in the country. Introduced in Canada from the Alberni Indian School on Vancouver Island and exquisite art work from St. Mary's School, Ontario.

As Christians, Indian children inherit religious themes according to family, every-day life. In their drawings of the Nativity, the Mother of God, St. Joseph and the Wise Men, the children show a keen understanding of the traditional Indian dress suspended from a tree. The Star of Bethlehem is shown in an Eastern setting, shone forth in all its brilliance over a tape.

Remarkable skill and life are revealed in the models of fretwork done in soft, light wood and portraying rearing horses, reindeer and other animals, not to mention the conventional fish.

New Used In Sundry

Cellulose Film Is Found Excellent Substitute For Human Tissue

Substitution of cellulose film for human tissues was described as a "safe" surgical technique by a Virginia surgeon, who reported success in sheathing a severed tendon with the filmy material in such a way that the deformity had become practically normal again.

Dr. Thomas Wheelock of Richmond, Va., after bringing with strong acid a five-inch gap between the severed ends of a cut tendon, he wrapped the tendon in cellulose film. The film was made of a paper rolled around a cigarette.

An 18-year-old boy in the Journal of Bone and Joint Surgery, had exhibited a certain deformity after a tendon was severed, and the tendon had been sliced by a piece of glass. But, after operation and sheathing of the cut parts with a tube containing this film, "the patient had excellent ability to extend the thumb, and at the same time, had no deformity (of the tendon), that he can almost fully flex his thumb normally."

May Move Observatory New methods of lighting have made the sky surrounding London so bright that certain types of astronomical work have had to be abandoned at Greenwich. It may be necessary to move the Royal Observatory, says Dr. H. Spencer Jones, Astronomer Royal.

Startles Whole Ship

Princess Margaret Rose Figured In Amazing Incident On River Steamer

An amusing incident occurred during the recent trip made by the Royal Canadian Mounted Police and Princess Margaret Rose down the River St. Lawrence, in the steamer the St. Katharine.

Margaret Rose got up on the cap of the bridge of the St. Katharine, and used her eyes and her wit, reports C. H. J. Seider in the Toronto Telegram. She knew that that little clock-like thing used to be broadcasted to his crew, but Margaret Rose did not know that she looked quickly at Queen Mary seated serenely by the bridge bulkhead enjoying the view of the great river, and she looked quickly at the Captain in the opposite bridge wing. Stepping to the microphone and standing on tip toes, she suddenly started Father Thames and the whole crew with the broadcast. "Are you enjoying it, Grandma? Isn't it lovely? We are soon going to have some tea now."

The children's voice was many times magnified. Margaret Rose used her vigorous lung power. They had tea then.

Mosquito Loiter

Scientists Prove That Insects Not Repelled By Odorous Perfumage

A lotion which repels mosquitoes, blies, and other insects, and which actually has a pleasant odor, is the latest result of collaboration between a Canadian scientist and an industrial company. The work on the part of the research specialists wasn't any too pleasant. They spent many hours in mosquito-infested swamps, trying many varieties of existing insect repellents and many new formulas. They finally came up with this one.

That, in every case, it wasn't the smell which kept mosquitoes and flies from biting, but the sound length created a new formula and when they used it on their arms and face, it caused insects to stay away from every occasion.

To this formula, a pleasant perfume was added. Further, tests showed that the formula was absolutely harmless for even the tender skin of babies. So it seems that this summer Canadiana will have a successful fight off all biting insects without having to use a lotion with a strong, unpleasant odor, and without fear of harming the tenderest skin.

Irishmen Enlist

Fine Type Of Recruits Being Secured For Royal Air Force

Irish authorities are worried by the comparatively poor response to their recent appeal for recruits for the Royal Air Force. The only bright spot in the 26 counties, it is said, is Donegal, where many men from the north have volunteered for the force.

The recruiting drive is part of the plan to raise the strength of the force from 20,000 men to 30,000 and to provide for air raid precautions work.

On the other hand, large numbers of Irish cross the border and the Irish Sea to enlist in the United States Army and a very fine type of recruit is being secured for the Royal Air Force. Prime Minister de Valera recently said in reply to a question in the Dail that representations had been made to Whitehall to discontinue advertisements in the Irish papers for air force men.

The policy of the Government is to maintain strict neutrality in the next year, but food supplies to Britain will be continued and efforts to help the Irish people for air force men.

Foundation Seal Said

Belgrade Has Been Planning Large Church For 30 Years

The foundation stone of what will be the largest church in the Balkans after St. Sophia in Istanbul and the largest single edifice in Yugoslavia has been laid in Belgrade. It will cost between 250,000,000 and 300,000,000 dinars and funds have been collected for it during the last 30 years. (The dinar was quoted in New York at 2.35 cents.) The church will be dedicated to St. Sava, the saint of Serbia, who lived in the thirteenth century and whose episcopate marked the beginning of the new period of Serbian history.

Gave Up To Sons

Ray Lindell, owner of a steel casting company at Quincy, Mass., came to open his office safe, using a combination known only to himself. Suddenly the combination came up in his hands. Police said a burglar apparently had given up efforts to crack the strongbox just as it was ready to fall apart.

League of Canada

present TOPICS OF VITAL INTEREST

by DR. J. W. S. McCULLOUGH

PLANNING FOR HEALTH

Public concern for public health means the leading edge of the current issue of "Health" of the interest. The editor of the official publication of the Health League of Canada says:

"The suggestion made in the House of Commons recently by the Honorable C. G. Power, Minister of Pensions and National Health, that a national conference should be called to discuss ways and means of developing a Dominion-wide health programme will meet with general approval. Such a conference was called in Washington last July and at that time the details of a health programme for the United States were approved."

"If a similar conference is to be called in Canada, considerable preliminary work will be necessary before it will be possible to approach the national health problems intelligently. This important and necessary work of preliminary studies by various groups. It is suggested that a national conference should be called to discuss ways and means of developing a Dominion-wide health programme will meet with general approval. Such a conference was called in Washington last July and at that time the details of a health programme for the United States were approved."

"The weakness of inter-provincial conferences of health such as have been held in the past, has been failure to undertake preliminary planning essential to the development of a health programme. It is serious that proposals brought forward have not been studied. The result has been a variety of proposals from different provinces, none of which could be carried out in the absence of unanimity."

"Nor is unanimity alone sufficient. It requires time to study and elaborate such proposals. It is unanimous and there are many health problems in Canada which require attention. Special programmes for various diseases and tuberculosis need specific action but in addition the general health programme is far from perfect and in the provision of full-time health service throughout Canada rests the solution of many disease problems. Health insurance is undoubtedly a question in which the need for Dominion and Provincial co-operation is urgent. Everything considered a national health conference will open up great possibilities for the improvement of health and lowering death rates throughout the Dominion. But the suggested conference is a long way off. It is suggested that a national conference be called to discuss ways and means of developing a Dominion-wide health programme will meet with general approval. Such a conference was called in Washington last July and at that time the details of a health programme for the United States were approved."

Editorial Note: Readers desiring the complete set of Dr. McCullough's essays articles at once may secure same by writing to The Health League of Canada, 105 Bond St., Toronto, Ont.

A New Invention

Makes Living Things Visible Under The Microscope

A new invention which makes living things visible under the microscope was demonstrated during the closing session of the American Medical Association.

The device introduces cold light deep into parts of animals and enables them to be seen normally. The inventor, Dr. Malvin H. Kniesley, of the University of Chicago, spent seven years in developing it.

"The new combination of cold light and a microscope reveals the effects of such drugs as insulin, morphine, aspirin and other substances as they affect body cells."

"The device is being brought to the attention of the medical profession and it is determined that it may prove useful in the diagnosis of disease, Dr. Kniesley said."

The Literary Beginner

After Lindell, owner of a steel casting company at Quincy, Mass., came to open his office safe, using a combination known only to himself. Suddenly the combination came up in his hands. Police said a burglar apparently had given up efforts to crack the strongbox just as it was ready to fall apart.

Long delay in kidnades takes Kindred all away.

Arctic Defense

See Design To Canada, By House Of Development Of Aviation

Necessity of guarding Canada's Arctic frontier, which looks into the vast yards of Europe's distance, is stressed by Walter E. Gilbert, veteran modern pilot, who has covered thousands of miles in the Arctic.

To-day Northern aerial routes, pioneered by Canadian airmen, many of whom were war-time pilots, no longer are "forgotten trails" of the North; oceans and the icy wilderness of the Arctic have as the barrier against attack on Canada's shores. Aviation has changed the picture.

Reports Germany sought air bases to Iceland and Greenland focused attention on the frontier of the north. It is only 2,000 miles from northern central Europe, a short distance under present aerial development, Iceland is but 2,000 miles from Winnipeg; Greenland 2,800, by air. And landlocked bays and level stretches of land afford ideal bases for aerial and naval craft along the boundary.

Six years ago Commander Wolfgang von Gronau, internationally famed German pilot, demonstrated the feasibility of the aerial highway from Greenland to Canada, a flight of but a few hours.

In a charted course from Greenland over the coast of Labrador, von Gronau flew to the Gulf of St. Lawrence, to Montreal, and from there to Chicago. In another flight in 1933 he crossed from Greenland to the Dominion, passed over Northern Ontario, via Cochrane, to Detroit. After he came to the United States, he continued to Churchill, Manitoba's northern airport, and across the barrens to the far north Mackenzie river country.

Recent non-stop flight of the Russian airmen, General Vladimir Korkin, from Moscow to Iceland, 4,000 miles, was another demonstration of quick aerial communication.

General Korkin failed to reach his objective, New York, due to compass and oxygen difficulties, but he demonstrated the feasibility of high altitude flight for long distances flying.

Canada might well look to the unprotected border of the Arctic—St. Catharines Standard.

Mut Know Every Detail

Much Depends On Personal Servants Of Their Majesties

Not the most important people who accompany the King and Queen on their travels are a few men and women of whom even Britain has never heard. Yet they possibly come into closer contact with the Royal Family than any in the Empire. They are the personal servants of Their Majesties.

That they have never been heard of is merely a sign that in their private lives the King and Queen are the same as other people, and that the world—just as the two heads of a family, albeit it is the first family in the world.

Their task is no easy one. Think, for example, of the job of Thomas Blount, the King's valet, who has the job of seeing that the King is always correctly dressed, no matter what one of his many engagements he wears. His knowledge for that job has to be encyclopaedic.

Every uniform outfit the King wears must be correct in every detail. If it isn't necessary to be sure to notice and there would be times when anything incorrect in regimental or other dress might possibly cause a night of sleepless, as if to say: "A wrong decoration. How could that have happened?"

It was, incidentally, a change for the King to be attended by a royal barber. He usually shaves himself, although James, at times, does the task for him.

Then comes James McDonald, assistant valet and butler, who keeps the royal wardrobe in order, attends to medals and so forth.

Before both of them comes Frederick Smith, the King's page, who, with two footmen, also accompany Their Majesties. Smith is what is known as a "blunder" in the palace court, because he wears a dark hair tail coat with a dark blue velvet collar, white waistcoat, gold buttons, white collar and tie. The footmen wear red coats, dark blue trousers with gold braid, white waistcoats, ties and shirts, when on duty.

"It has been well said that failure only begins when you leave off trying to succeed," said Neville Chamberlain.

An electric fan and insect trap are built into a new floor lamp without altering its appearance.

It is against the law to share any part of your meal with a friend in a restaurant in Omaha, Neb.

Rhubarb Cultivation

Can Be Grown For Both Summer And Winter Use

No fruit or vegetable garden is complete without from six to twelve rows, according to the size and needs of the family, of either Rhubarb or Macdonald rhubarb, states James Dalkeith, Head Gardener, Experimental Station, Kentville, N.S.

Rhubarb thrives best on a comparatively rich, deep, well drained soil. The soil selected should be preferably prepared the autumn previous to planting by spading in deeply and thoroughly a good application of stable manure where space will permit it may be ploughed under. Early the following spring the soil should be well worked up and commercial fertilizer, preferably 5-10-10 applied at the rate of five pounds per square rod and well mixed with the soil prior to planting.

When resetting crowns taken from old dug-up clumps, single crowns should be selected, removing all old roots. These are set three feet apart in rows five feet apart. Plant the crowns so that its growing tip is just below the surface of the soil and tramp the soil firmly. Hoe, dig or cultivate at intervals to loosen the soil and control weeds. After the autumn frosts kill the leaves, mulch with straw or straw manure for the winter. Remove this in spring and continue to dig and cultivate. Strong rapid growth of the leaves is the objective. The leaves manufacture the nutrients that develop the roots, in which are stored the reserves of food that make for the rapid growth of the stalks that we use as food, in the early spring.

Remove no stalks in the first year, but few the second, and after that never more than half the stalks that develop. The result will be large, tender stalks for the table. It takes three or four years to develop a really productive crown. Every farmer or gardener who has a good house cellar should grow his own winter rhubarb. Four to six stalks, when planted annually, and from the fifth year on this number can be dug up annually for winter use. In this way continuous production for both summer and winter use is possible. The roots to be used for winter forcing are dug just prior to the freezing of the ground. After digging they should be placed on boards, out of the sun, and left exposed till January 15. Then two of these roots may be brought into a warm dark cellar at bi-weekly intervals into a hot, packed cellar with soil and peat moss and well watered when brought in and freed from the soil. A small quantity is required for forcing. Six wintered roots should give a continuous supply of winter rhubarb for two months.

Will Change Again

Some Time Word "German" Will Stand For Friendly Nation

The First German Presbyterian Church of Orange, N.J., has changed its name to the word "German" is very popular with people here," explains its pastor. Hereafter it will be the Wilhelms Street Presbyterian Church.

Somewhere we're sorry. We're sorry that the Wilhelms Street Presbyterian Church of Orange, N.J., has changed its name to the word "German" is very popular with people here," explains its pastor. Hereafter it will be the Wilhelms Street Presbyterian Church.

R.C.A.F. GUARD OF HONOUR MOUNTED AT RIDEAU HALL

Assid full military pomp and splendor, the Royal Guard of the Household, supplied by members of the Royal Canadian Air Force, was mounted at Rideau Hall, Ottawa, where the King and Queen stayed during their visit in the Canadian Capital. Lord Tweedsmuir, Governor-General of Canada, is seen above after granting the traditional permission to the Royal Guard to march to the front of the viceregal residence until the Royal visitors left.

Vindication Of The Potato

Noted Authority On Diet, Aves That It Is Good Food

Now watch the potato strut and plume himself, and do not be surprised if he tries to "hold you by his glittering eye." The potato, after years of the shadows, almost in quarantine, has received a clean bill of health from no less an authority than Sir John Boyd Orr, the noted authority on diet.

The potato is good food, says Sir John. "Eat lots of potatoes," is his advice. "They're not fattening. Milk and potatoes are almost a perfect diet."

The potato has suffered unduly in this age of juices and vitamins and fats. And he has suffered patiently, not even rebelling when people buried at him the meanest names in the dietitian's vocabulary: "You are only a lump of starch." With his new certificate of character he should come back into favor with a rush—Vancouver Province.

Penthouses For Poultry

Cooks Are Bored On Flat Roofs In New For Safety

In Lima, Peru, and vicinity, poultrymen build their henpencs on the flat roofs of their long, low houses, and in these roof-top chicken "penthouses," poultry thieves, chicks are hatched, eggs are laid, and chickens grow fat for market, each evening. The poultrymen go up to their house-top to collect his eggs.

The oldest agricultural experiment station, the Rothamsted Station in England, will celebrate its hundredth anniversary in 1943.

The stream-lined bathtub has arrived. All we need now is a cake of soap with hydraulic levers.

Dealing With The Dandelion

Plant That Has A Pervasive That Will Not Down

This is the time of year when gardeners renew their lifelong campaign against the dandelion. We do not need to remind them that it is mostly effort wasted, because this golden flower has survived long wars and shows each Spring vigor and persistence worthy of a distinguished ancestor.

If the dandelion were a timid plant of precarious existence, with a fancy for hot-houses and their artificial warmth, it would be prized highly and no doubt would bring fancy prices on the florist's market. Few flowers have a finer yellow, and a field of dandelions in bloom is something worth seeing. But a dandelion in the front lawn is just a weed and nothing more, and people dig it up and put salt on its roots and practice all sorts of measures for its elimination with very little success. The dandelion may be down but it is seldom out.

So it is just as well to accept the dandelion philosophically and think of it merely as a flower strayed from its proper setting. After all, think or tattle persisted in coming up from the ground, and would ruin them just as energetically, forgetting the time and labor given their golden flower in another place—Ottawa Journal.

Wintry days over, Kalamazoo plays football to celebrate the return of the sun. Rev. George Olinville said in a lecture at Winnipeg. The ball is made of caribou stuffed with hair.

James Whitcomb Riley, Hoosier poet, at one time used the pseudonym of Benjamin F. Johnson.

African natives make blankets from the stomach lining of elephants.

An All-Purpose Feed

Keeps Cattle In Excellent Condition States Stock Owner

It is necessary to have one meal mixture for the calves and another for the heifers, still another for the milk cows and a further mixture for dry cows," Albert Belling, who runs a herd of Holstein cattle along with his extensive poultry business at Elmira, Ont., says not. He has an all-purpose dairy mixture. Here it is: 160 pounds ground oats, 500 pounds bran, 400 pounds yellow corn, 200 pounds linseed oil meal, 200 pounds dried brewers grain, 150 pounds fish meal, 50 pounds kelp, and 25 pounds iodized salt.

"This mixture keeps our cattle in wonderful condition," says Belling. "We have had no cases of any kind since we have started with it. It is as good for calves and heifers as it is for the cows. I don't need to add that it simplifies our feeding a whole lot."

Taking Long Journey

Young Rev Travels Alone Across Sea For Eye Operation

Carl Workman, 10 years old, son of a dairy farmer at Junesau, Wisconsin, is going to Germany, travelling most of the distance alone, to have an eye operation. His father, Frederick Workman, said he would take Carl solo to Chicago, in 1944, when the Workmans lived in Colorado. Carl said fruit had been agreed with a poison, the father explained, and during a serious illness which followed became partly blind. The boy's uncle in Germany will pay for the operation.

When a telegram informed a man in Nagam, India, that he had won \$5,625 in a lottery, he went into hysterics and died before he could receive the money.

New Medical Idea

Put Patients To Sleep By Process Of Refrigeration

Life widens a new medical idea, human hibernation, is spreading among the thousands of doctors at the annual meeting of the American Medical Association.

They want to try it on heart disease, insanity, tuberculosis and its representing the virus gained from degenerative to infectious diseases. They have been standing around a "hibernation" in a small scientific exhibition booth, seeing something that never before was done to human beings.

The pictures show women being put to "sleep" like hibernating bears, by refrigeration. The hibernation exhibit is by Doctors Temple Fay and Lawrence Smith of Philadelphia.

The women are covered with cracked ice like frozen fish. An electric fan is turned on. In three hours their internal temperature are forced down below 90, usually to a temperature of 59. They go to sleep.

The room is kept cold so that when the ice is removed they stay cool like a bear in his winter cave. They are kept thus for five days. At the end they are awakened by hot coffee, or warm applications. They arouse smiling, as if from sleep, and with no memory of what has happened differently from completely dreamless sleep.

During the "hibernation" the pulse beats disappear. Only the electrocardiograph shows the heart is still beating. Their kidneys stop. Bowels and apparently all digesta stop. But this, ordinarily a sign of approaching death, seems of no danger, because at the same time analysis of the blood shows it has ceased to fill up with waste products. There is nothing to eliminate.

Metabolism itself slows down 10 to 20 per cent. They should die of pneumonia but not one has ever died. The bodies of pneumonia patients haven't caught cold or anything else whatever as yet. The germs in the bodies of pneumonia patients are along with the entire organism.

Speculating medical writers say it might give the heart a rest, perhaps, but nothing else can, so far. They point to the recent announcement that insulin for diabetes, insulin and camphor shock. The patient sinks into a deep coma close to death and coma seems to be the cause of improvement. Here, the speculating doctors say, is a coma safer, longer and apparently more restful, for insanity.

Tuberculosis is a germ disease. If the bacteria of pneumonia or tuberculosis which watched this exhibit, the bacteria will slow down while tissues hibernate. In hibernation, perhaps, the body's defences will be able to throw off tuberculosis when the sleeper awakes.

Runs Into Billions

Economic Loss Incurred Through Accidents Is Very Heavy

Safety campaigns are usually thought of in terms of saving lives and the human suffering involved. But that is natural enough, and right enough, for they are the first concern.

But there is another side to it, and one not usually so easily grasped. That is the tremendous economic loss involved. More than 100,000 people are killed, and 375,000 crippled for life every year, and the annual economic loss is not less than three billion dollars, according to D. F. Denny, president of the National Safety Council of the United States.

It is a heavy toll. Every step taken to cut down accidents not only saves lives and misery, but saves a loss that is a tremendous drain on the economic machinery of the country. Multiply by thousands the dislocations, interruptions, and costs that come to a single plant by an accident, and the picture clears. Progress in safety is being made. Co-operation and watchfulness can increase that progress in 1939—Regina Leader-Post.

An Albinos Buffalo

An albino buffalo, as rare they occur only once in millions of animals, has been sighted in Alaska's growing bison herd. Colonel Harry Havelle, ranchman proprietor of Fairbanks, who reported seeing the calf, said it was pure white, except for slightly pink markings on the nose and hoofs.

Mining phosphorus with its oil colors, R. H. Woodard in Alaska's Woodcliff-on-Sitka, paints pictures which are luminous at night.

A 90-foot blue whale estimated to weigh 192 tons was the biggest whale killed of the 1937-1938 season.

Bananas account for 65 per cent. of the total exports of Honduras.

This is Life Insurance

IN THOUSANDS OF Canadian homes, life insurance money pays the bills—helps to support widows and children—and provides for old age.

Life insurance dollars buy the food for three square meals a day. They buy clothing and other necessities of life. They pay the rent and fuel bills to ensure warm, comfortable homes. They give children an education and a mother's care.

Each year, life insurance policy-owners and their beneficiaries in Canada receive 150 million dollars—five hundred thousand dollars every working day—twenty thousand dollars every hour.

And it is significant that more than 75% of all life insurance payments are made to living policyholders.

Life Insurance
GUARDIAN OF CANADIAN HOMES
